Date

A Code Analysis provides detailed information on provision of the NBC, NECB or NPC that apply to the specific project demonstrating design and construction is intended to meet minimum requirements.

Value of Construction is the total cost to the owner for the building construction in its completed form and includes the cost of all building work, materials of construction, building systems, labour and overhead and profit of the contractor and subcontractors.

Building area means the greatest horizontal area of a building above grade within the outside surface of exterior walls or within the outside surface of exterior walls and the centre line of firewalls.

Building height (in storeys) means the number of storeys contained between the roof and the floor of the first storey.
